

CAREER OBJECTIVE

Computer Science undergraduate with a strong foundation in programming, problem-solving, and software development. Skilled in building efficient applications and eager to contribute to innovative projects while continuously learning and enhancing technical expertise.

EDUCATION

K.R. Mangalam University <i>Bachelor of Technology in Computer Science Engineering (AI & ML)</i>	2023 – 2027 CGPA: 8.30
--	---------------------------

TECHNICAL SUMMARY

Languages: Python, Java, JavaScript, HTML, CSS
Libraries/Frameworks: Node.js, Express, React, Django, Flask, Pandas, NumPy, Rasa
Databases: MySQL, MongoDB
Dev Tools: Visual Studio Code, GitHub, Power BI, Excel
Soft Skills: Problem Solving, Adaptability, Effective Communication, Teamwork
Core Subjects: DSA, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Machine Learning Intern <i>K.R. Mangalam University</i>	Jul 2024 – Aug 2024
- Completed a 6-week internship focused on Machine Learning concepts and real-world applications. - Explored supervised and unsupervised learning algorithms using Python and Pandas. - Strengthened understanding of AI concepts and data processing pipelines.	
Software Engineer Intern <i>Hitachi Systems Pvt. Ltd., India</i>	Jun 2025 – Aug 2025
- Built an AI travel assistant backend using Flask and Django, integrating external REST APIs for real-time hotel and flight booking. - Implemented real-time booking and confirmation workflows using external REST APIs. - Enhanced chatbot interaction and improved overall user experience.	

PROJECTS

AI Travel Chatbot	GitHub
Tech Stack: Python, Rasa, Django, HTML, CSS, JavaScript, REST APIs, DeepSeek	
- Built an AI-powered travel assistant using Python, Rasa, and Django. - Integrated backend APIs for hotel and flight booking along with slot management. - Crafted a responsive user interface using HTML and CSS to improve user experience.	
Smart Billing System for Canteen	GitHub
Tech Stack: Python, Flask, HTML, CSS, Excel	
- Created a web-based billing system using Python, Flask, and Excel. - Optimized order processing workflows and automated invoice generation. - Designed a clean and responsive interface using HTML and CSS.	
Churn Analysis and Retention System	GitHub
Tech Stack: Python, Pandas, Scikit-learn, Flask, HTML, CSS	
- Engineered an ML-based churn prediction system using Python, Pandas, and Scikit-learn. - Implemented a Flask web application with HTML and CSS for data visualization. - Evaluated customer behavior data and proposed retention strategies.	

CERTIFICATIONS

- Data Analysis with Python – IBM
- Mastering Machine Learning
- Probabilistic Modeling and Reasoning in Python
